Crown Point Of Sale Crack + Free Download

KEYMACRO is a simple and comprehensive point of sale application. It is really a good solution for the help of your business, whatever it is your business. KeyMACRO is a good e-commerce, POS, and business management solution. It comes with extensive features that will support you in running and managing your business. Free to use KeyMACRO is free. However, you will need to register to use it. The registration is free and very simple. You will only need to provide your name and email. After the registration, you can login to the application and start using it. You can use it in your local network as well as the internet. Easy to use The application is really easy to use. The interface is designed in a way that it is user-friendly for your business. The dashboard has many tabs and it is really simple to navigate through. The application has a simple and clean look that can help you make a good impression on your customers. Store inventory For the convenience of your clients, you can store the inventory in the application. Whenever the item is sold out, it is displayed on the dashboard with an alert. The inventory can be viewed and updated on the dashboard as well. Payment Methods With the integration of PayPal, you can use the payment methods that are offered by PayPal. No need to worry about your customers. If they pay through this payment method, you can manage their accounts and complete the payment through PayPal. Restaurant Management KeyMACRO can manage your menu, orders, and delivery. To add a new item, you will need to create a new menu. Whenever a new order is created, the menu will automatically update and display the new menu. Delivery You can use this feature to create a delivery, such as pizza or delivery meals, for your clients. There are also many widgets to make your deliveries easy. These include the distance calculator, the map to your delivery location, and the food pick up. Supplier Management You can save all of your suppliers and suppliers companies into the application. You can search through them based on the different parameters. You can manage your clients based on your suppliers. Kisscafé Management Another feature that is worth mentioning is the "Kisscafé" management. You can create a detailed timeline with the history of your business. You can also add your suppliers or suppliers companies. Whenever your suppliers or suppliers companies add orders to you, you can manage the order 1d6a3396d6

Crown Point Of Sale Serial Key

Thanks to the following configuration parameters, customers can be added to a database from remote locations. When this setting is enabled, remote locations can access the sales database and add information to existing rows or to create new rows. This should be set to true in production environments. You can assign a password to the sales database using the PASSWORD_NAME parameter, and a special login, the TOKEN_NAME. With these you can give non-production users access to the system while protecting them from being able to access any parts of the application. This setting can be configured in the GENERAL tab. The Default Email, which is used for any new user creation, can be configured in the EMAIL_NAME setting. The URL, that should be used to access the web-based sales database, can be set using the URL_NAME setting. When customers are added through remote locations, their information is saved to the sales database. The BUYER_NAME and VENDOR_NAME can be set in the GENERAL tab. The CRON_SCRIPT parameter specifies the path of the script that is run every minute. The CLEAN_CUSTOMERS parameter specifies whether customers should be cleaned when they are added. A separate log file is created for each sales database. It contains information about transactions, such as the date of the transaction, the time it was generated, the vendor and buyer information, and a description of the transaction. You can use this file to monitor your sales database for problems. You can configure the PDF_FORMAT parameter to control the method used to generate PDFs. The SALE_TIME_FORMAT parameter specifies the time format for the date and time fields in the sales database. Crown POS App Download It is built on CodeIgniter with all the latest PHP 7 features and includes all the modules. Points to Note The Sales database is standard SQL format. A Microsoft SQL Server or Oracle database is required. A separate log file is created for each sales database. You can configure the PRINT_COUNTS and HIDE_NO_DATA to exclude certain records from the CSV export. The DEFAULT_TIMEZONE parameter sets the default time zone for all dates and times. Crown POS Pricing Pricing starts from just $17.50 Free Trial CrownPOS is

What's New in the?

CrownPOS is a simple and comprehensive Point of Sale application that can come in handy for new business owners as well as established entrepreneurs that are searching for an alternative tool. Clean and straightforward interface The UI seems to be one of the app's strengths as its construction allows even the most inexperienced user to find his way around it. First of all, all tabs are neatly arranged on the toolbar which helps with orientation. Secondly, all tabs prompt simple windows that require only the necessary information input. For example, if you need to add a new customer, the displayed template will carefully guide your input, assuring you that no scrambled details will be introduced. Create customers and suppliers databases For possible delivery services, you have the "Add customer" tab, which allows you to create a profile based ticket that contains a customer's name, mobile, address, city etc. This feature can come in handy for a faster management of loyal customers. Same goes for the "Supplier" category; Fill in the blanks and create lists with all of your supplying companies or agents. Also, the already saved instances can be updated is the situation demands it. Select a item from the list and use "Update" to change its information. Charge down payments/up payments Regarding the client list mentioned above, CrownPOS lets you charge your customers before or after the consummation. Use the "Down Payment" tab to create a record for a honored order, and "Up payment" for clients that paid before the trade was completed. To sum it up CrownPOS is a lightweight and user-oriented application that can help a business owner with its food oriented business. The interface is built in simple and organized way, which is a great feature for users that are not proficient with these type of apps, or for senior operators. Full version of CrownPOS is $169.95 This is the free trial version. You can use the trial version for free for 30 days. Screenshot of CrownPOS.
