It helps to easily create a unified development environment, allow you to integrate tools, and share code with otherPhotoreactions of naphthalimide dyes: new insights from Z-scan studies. The photoreactions of two naphthalimide dyes, NDI and NDc, have been studied by using optical correlative Z-scan techniques and transmittance measurements. The two dyes have different photophysical and photochemical characteristics, and their different photophysics will be reflected in their different photoreactions. The results indicate that both the naphthalimide dyes can photochem 3da54e8ca3
