Markup Import and Markup Assist have been updated and enhanced in AutoCAD 2023. With Markup Import, you can incorporate feedback from paper, PDFs, and Web sites. Importation from these sources will automatically update your drawing, preserving your layouts, dimensions, and annotations. With Markup Assist, you can automatically create annotations on your drawings and add your annotations to the drawing content that will be incorporated into your drawing.

- Import markup from paper: Use a postcard or any PDF or PostScript file that includes the annotations you want to incorporate into your design. Or import a Web site and use the embedded links to navigate to additional information. With Markup Import, you can easily send these annotations back to the customer, for example, when the customer reviews your drawing.
- Import markup from PDF or PostScript files: PostScript and PDF files can be printed from your CAD system and converted to PDF. Use a PostScript file to convert to a PDF document, and then import the document into your AutoCAD drawing.
- Import markup from the Web: You can add annotations to drawings by navigating directly to the Web site on the Web browser. With Markup Assist, you can also create annotations, and your annotations will automatically update the drawing content.
- Import markup from the clipboard: You can easily import drawings with information on the clipboard and add the information to your drawing.
- Import markup from email: You can easily attach marked up drawings to email messages and send them directly to the recipient.

Importation of printouts from paper and PDFs using the Import From Paper or PDF command, or by using the import markup from paper command, creates an action and prints the first page of the source material to the default printer. To import the entire document, use the Import Markup From Paper or PDF command. You can import a single page or all the pages in a document to your drawing.
