"With the increased complexity of modern-day games, we've become focused on a new player experience," said Andrew Wilson, Senior Game Director. "We've used motion capture technology to simulate realistic player movement and tackling, allowing us to increase the stakes and intensity of these key gameplay moments." Free FIFA Ultimate Team Memberships Ultimate Team (UTC) is back and better than ever in FIFA 22. FIFA Ultimate Team's existing functionality will remain as is, so players can continue to collect and trade FIFA Ultimate Team cards to make their squad of the best players in the world. On top of that, players are now able to purchase FIFA Ultimate Team memberships in single-player games. These FIFA Ultimate Team memberships unlock new content, including packs with a new card to create an even stronger team. FIFA 22 features an additional multiplayer mode called "Face-Off" that lets up to eight players create custom dream teams of their favourite players by unleashing them onto the pitch. Additional details can be found on FIFA.com and as they become available. Mod Features Power Up Your Team UEFA EURO 2016 Competitions: The Champions League, Europa League, and UEFA EURO 2016 Qualifiers are all playable on FIFA 22. Fans can watch games streamed live on the UEFA EURO 2016 official YouTube channel, or they can watch on UEFA.com and go head-to-head against their friends in FIFA Ultimate Team on PlayStation 4, Xbox One and PC. Supporters from over 30 countries, including Brazil, Switzerland, France, Germany, Belgium, Italy, the Netherlands, and Mexico, may participate in the UEFA EURO 2016 qualifiers. Record the Greatest Moments Commentary/UGC Highlights: With the introduction of the new "Personal Highlights" feature, players can now watch all of their best moments throughout a Career Mode match by accessing a new, dedicated "Replay" menu. Players can also share "Predicted Goals" using their microphone, highlighting the moments of the match they predicted to be the most important. The "FIFA 22 Predictions" mini-game is back for UEFA EURO 2016. Create your own custom prediction game and see if you can beat the odds. The challenge is on for those who put a prediction into the FIFA Ultimate Team Community Challenges. Introducing "Live Lounge"

FIFA is the must-play worldwide soccer game and has sold over 600 million units worldwide. Play as your favourite teams in the UEFA Champions League™ and UEFA Europa League™, or experience FIFA in a whole new way with the addition of The Journey. FIFA Ultimate Team™ (FUT™) now includes a fully integrated live auction, as well as a new and improved Trading Card Market. How does the new game play? The new EA SPORTS™ FIFA 22 game features a real-football engine, which means teams run like a proper soccer team, and pass and shoot in the right direction. Add to that improvements in both player animations and ball physics, a new pitch-side intelligence that helps referees and coaches manage the match, and goalkeepers who know when and where you're going to shoot from. There's also a new, socially connected Player Impact Engine, which lets you watch other players on the pitch in a new, connected league, and even connect with other players you know on other platforms (via your FIFA account) and get the inside on their match performance. And of course the first team to join the EPL will benefit from the addition of 360-degree goal animations. How is the new game engine designed? EA SPORTS™ FIFA 22 features a completely new game engine to make the real-football feel even more authentic and immersive. The game engine responds dynamically to real-world soccer situations in areas such as team positioning, crowd noise, and the direction of the ball and players. Additionally, the new game engine is equipped with features that allow the game to adapt during matches. When the flow of the game begins to slow, the engine will select the best moment to make a substitution or to make a change to game settings, for example. What technology advances does the game feature? In FIFA, defenders will use AI-powered intelligence to make smart and swift decisions, and to win the ball back, in low-pressure situations and when under pressure. The defenders will now use their heads to analyse the situation, determine their positioning and get set to intercept the ball. Players will even use their brain to read the game better, with a new awareness system that helps them pick up subtle changes and movements. FIFA 19 introduced a whole series of new physics-based and visual advancements for players, as well as the first main iteration of the Player Impact Engine. bc9d6d6daa
