Written by the PluginMonkey team, Liscdelay delivers a selection of delay effects that you can dial in and dial out as you like. Stick each delay onto its own track or delay across multiple tracks in the mix, and the resulting sound is a special one. The plugin consists of three delay sections that have their own low, high and band pass filters which you can fine-tune. Delay effects allow you to manipulate audio to give it a delayed sound. Most of the files in this plugin are 3D-object-based, giving you more flexibility to place your sound. You can directly choose an audio object to use for the delay. You can also drag and drop the object directly to the edit window. You can even change the audio object on the fly. Or you can split the audio object to two audio objects. The beta-glucanases of sourdough were purified by sedimentation in 0.4 M sucrose from extracts by subsequent chromatography on DEAE-Sepharose. The procedure resulted in a 14-fold enrichment and final specific activity of 0.3 mumol min-1 mg-1 of protein. The enzyme preparations showed beta-glucanase activity towards isomaltooligosaccharides of DP 5-9. A molecular weight of 70 000 was estimated. The beta-glucanases from sourdough and from yeasts show a remarkable similarity concerning charge and catalytic properties. Both enzymes hydrolyse beta-glucan from storage yeast and their degradation products, namely glucose and maltose. In contrast to yeast beta-glucanases, sourdough beta-glucanases catalyse considerable side activities, eg. against
