Windows 7A .Titans to face Texans in preseason game The Titans head into the 2017 season with high expectations and most of those expectations go towards Marcus Mariota and their offense. We got to see why they're hopeful with Mariota in two preseason contests last year. They were strong in both matchups, but were much better in their matchup against the Cowboys. They managed to score 28 points in the second half with Mariota. They had four touchdowns in the second half alone and were able to finish with 49 points. The Titans offense is led by Mariota, but there are some impressive players on the roster as well. Dontrelle Inman is one of them. The Titans drafted him in the seventh round, but did not think much of him out of Ole Miss, then he became injured and ended up being picked by the Cowboys. On Saturday, Inman showed off some of his potential with three catches for 36 yards and four touchdowns. In his career at Ole Miss, Inman had 27 catches for 447 yards and seven touchdowns.Q: How do I use XSL to transform my XML to HTML in PHP? How do I use XSL in PHP to transform XML into HTML code? A: What you're asking for isn't an XSL but a template. You can create a template with `$dom->createText('/whatever');` or `$dom->createElement('whatever', '/whatever');` or whatnot. But that's just a crude hack. Template languages are tricky, and the PHP SimpleXML example shows something along the lines of what you're talking about:
