Free - Air Resonance (Fs).35 Hz; The total quality factor of the speaker (Qts). 1.479; The electrical resistance of the voice coil (Re). 3.6 ohm; What's in the box? WITB: Subwoofers. Basically, these are ordinary shelf models. Most subwoofers have a rated input power of 300 to 500 watts. Basically, these are subwoofers made in MDF cases, and some models are made of plywood. There are also subwoofers made in plywood and plywood cabinets. Some models have a fiberboard body. Subwoofers use conventional speakers: either with a paper cone or with polypropylene (less often). There are speaker models where the paper has been replaced with coke.
