What is a Wic Reset key? A Wic Reset key is a word(s) or character(s) that can be entered into the Wic Reset utility in the Epson Workforce area to reset the carriage position(s) to 0, not 1, as the default action. This is often used by Epson printer repair technicians to reset a printing head if the carriage ran into some blocks (stuck on the carriage) and the head itself stopped moving. wics reset key.com does not intend to collect any personal information about you.
